Structured Cabling

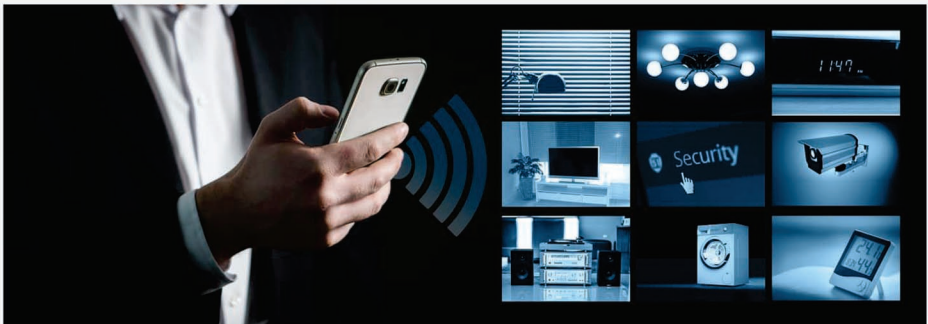

Structured cabling systems are becoming increasingly complex and sophisticated, meeting greater demands and workloads. With emerging connectivity developments in hardware and software, structured cabling system tolerances are becoming ever more stringent. A network's physical infrastructure must incorporate security and integrity into its inherent design, as well as the ability to adapt to changes in technology.

Nexcom team provides an end-to-end service from design to implementation. We design and build cabling infrastructure systems that support multiple voice, data, video and multimedia systems.

CCTV Security Solution

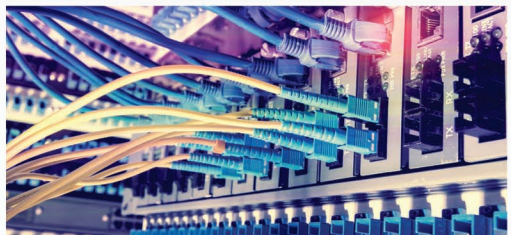

CCTV System is an effective prevention technology. Video Surveillance (CCTV) utilizes the latest digital technology to monitor access to secure areas, unauthorized activities, theft or criminal damage and personal safety or even provide a remote response to an intrusion.

Optical Fiber Solutions

Fiber-optic communication is a method of transmitting information from one place to another by sending pulses of infrared light through an optical fiber. The light forms an electromagnetic carrier wave that is modulated to carry information. Fiber is preferred over electrical cabling when high bandwidth, long distance, or immunity to electromagnetic interference is required. This type of communication can transmit voice, video, and telemetry through local area networks or across long distances.

Optical fiber is used by many telecommunications companies to transmit telephone signals, Internet communication, and cable television signals. Researchers at Bell Labs have reached internet speeds of over 100 petabit × kilometer per second using fiber-optic communication.

Public Address System

A public address system is an electronic system comprising microphones, amplifiers, loudspeakers, and related equipment. It increases the apparent volume of a human voice, musical instrument, or other acoustic sound source or recorded sound or music.

Audio Video Intercome

Intercom systems are crucial for home security. The systems take various forms, and they have become a popular component of home security in the modern world of technology. Honestly, technology is improving while the costs are going down.

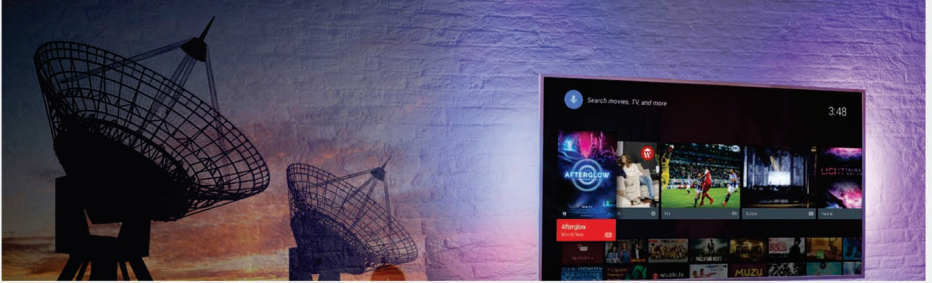

Gate Barriers

NEXCOM is the best integrators for automatic barrier systems and automatic gates in DUBAI. We provide commonly used automatic gate like Swing Gate, Sliding Gate, Industrial Gate, Garage Doors. An automated security gate is one of the highly sought after residential entryways. Having an automated driveway gate installed at home doesn't just mean you don't need to get in and out of the vehicle just to close the gate. It also helps in securing your home from undesirable conditions.

SMATV

SMATV stands for Satellite Master Antenna Television and refers to a system that uses multiple satellite and broadcast signals to create a single, integrated cable signal for distribution to a cabling network. In other words, with an SMATV system, you can become your own in-house cable company.

Annual Maintenance Services

Our Annual Maintenance Services provide our clients with comprehensive support plans to address requirements of managing our client's – Extra Low Voltage Systems and other structural backbone systems installed in the premises. Moreover, our services are fully customizable – and we can create a support plan just as required by our clients. We could offer Comprehensive & Non-Comprehensive maintenance contracts based on systems aging, wear & tear factors.
